

Claims:

The previous claims 1-34 are canceled.

The new claims 35-42 are added.

35 (New). A method of protecting a vehicle license plate by a protector and a holder with pressed or expanded function comprising to screw or push the protector through the hole on a vehicle license plate and into the holder on a vehicle body to hold the protector, plate and holder together after the pressed or expanded part reruns for protecting the plate from being stolen.

36 (New). The method of claim 35 wherein the holder on a vehicle body is the existing hole or holder on a vehicle body or an additional holder.

37 (New). The method of claim 35 wherein the protector has a function to be pressed or expanded.

38 (New). The method of claim 35 wherein the holder has a function to be pressed or expanded.

39 (New). The method of claim 35 wherein the protector is held by the holder firmly by a spring or screw.

40 (New). The method of claim 35 wherein the protector is not taken out from the holder without releasing the connection between the protector and holder.

41 (New). A product for protecting a vehicle license plate, plate frame or cover plate according to the method of claim 35.

42 (New). A product for releasing the connection between the protector and holder according to the method of claim 35.
